

Dermal Collagen Peptides Liquid

Collagen peptides specifically designed to improve the quality of skin, hair and nails. Clinically proven to reduce eye wrinkles in 4 weeks.

Each serving (10ml) contains:

Verisol® Bioactive Collagen Peptides™

Type I and III Hydrolyzed Collagen (bovine)* 2.5g

*Verisol® and Bioactive Collagen Peptides™ are registered trademarks of Gelita AG.

450ml bottle

Non-GMO, gluten, soy and dairy free.

Collagen is the major structural component of skin, hair, nails, joints and bones.

In order to localize collagen production, **Dermal Collagen Peptides** use leading bioactive peptides, clinically proven to target collagen production and counter collagen decline - directly at dermal tissue.

Dermal Collagen Peptides consist of **Type I and Type III bovine peptides** known as Verisol®. These peptides specifically signal and simulate fibroblast cells to synthesize collagen production in the skin and nails. Their amino acid profile is predominantly made up of small peptides in the range of 4-5 amino acids (2kDa or Kilodaltons)

or less. This is important because small peptides allow for absorption of the entire peptide chain without being broken down during digestion.

Multiple, double-blind, randomized placebo controlled trials have been published on these bioactive peptides and proven their effectiveness for skin health. Research has found that supplementing for 4 weeks with these bioactive peptides can increase skin elasticity by up to 15% and increase collagen content by 60%.

Incredibly, a reduction in the visibility of fine wrinkles has also been noted after only 4 weeks, with reductions in cellulite content of the skin after 3 months. Unlike most cellulite products on the market which focus on fat

Key Points

- Contains small peptides of only 4-5 amino acids (2kDa) in length, thereby improving absorption and minimizing the need for digestion
- Clinically proven to reduce eye wrinkles in 4 weeks, speed nail growth, reduce nail chipping and reduce cellulite appearance after 2 to 3 months
- Each 10ml serving contains an evidence-based dose of 2.5g of bioactive collagen peptides per day, allowing for improved patient compliance
- 45 servings per bottle

reduction or improving circulation, these bioactive and small peptides uniquely stimulate the formation of extracellular matrices within the skin.

When it comes to nail health, research has shown less chipping and faster nail growth after 2 months and 3 months, respectively, of supplementation with these bioactive peptides.

Dermal Collagen Peptides contain 450ml of bioactive peptides per bottle. This allows for a total of 45 servings at the evidence-based dosage of 2.5g per day.

Non-Medicinal Ingredients: Purified water, citric acid, potassium sorbate, xylitol, beta-carotene, natural orange flavour, stevia.

Indications: Helps with the appearance of smooth skin and with reducing wrinkles and fine lines. Supporting skin elasticity and healthy collagen production. Clinically proven to help reduce eye wrinkles in as early as 28 days.

Directions: Adults - Take 1-2 servings (10-20ml) per day or as directed by a healthcare professional. **Shake before use. Refrigerate after opening.**

Warnings: Do not use if safety seal is broken. Consult a healthcare professional prior to use if you are pregnant or breastfeeding, or if you have liver or kidney disease or if you have been instructed to follow a low protein diet.

Known Adverse Reactions: May cause mild gastrointestinal disturbances.
