Whey Protein
Isolate

GlucoBalance® - Healthy glucose levels depend on the presence of a wide range of micronutrients. The typical American diet, high in refined and processed foods, is often lacking adequate levels of these important nutrients. In addition, individuals with blood sugar disorders may have a special dietary need for higher amounts of micronutrients supplied by **GlucoBalance®**

ChondroSamine Plus® - Connective tissues, like those found in joints, require adequate supplies of important nutrient building blocks to maintain their integrity. This is especially true following injury, or for those with chronic conditions such as osteoarthritis. **ChondroSamine Plus®** supplies a wide array of essential key nutrients, including forms that are unique to Biotics Research Corporation.

Bio-Multi Plus™ is a versatile, balanced multiple vitamin and mineral supplement supplying unique forms of important nutrients available exclusively from Biotics Research Corp. Available in three versions: **Bio-Multi Plus™**, **Bio-Multi Plus™ Iron Free**, and **Bio-Multi Plus™ Iron & Copper Free**. Ask your clinician which formula is right for you.

BioProtect™ supplies potent, broad-spectrum antioxidant support. Antioxidants have the ability to "scavenge" free radicals and inhibit their chain reactions. The multitude of antioxidants provided by **BioProtect™** play various roles and act in synergy to support the body's natural defense mechanisms.

Optimal EFA® Caps provide a complete, healthy balance of the health-promoting fatty acids, so important to good health. Fatty acid imbalances are common, and essential fatty acid (EFA) deficits generally occur in combination. Therefore, supplementation with the balanced combination of EFAs supplied by **Optimal EFA® Caps** is prudent for optimal health.

Intenzyme Forte™ is an outstanding and highly effective proteolytic enzyme formulation. It offers an effective treatment for muscle soreness and discomfort due to the rigors of overexertion. **Intenzyme Forte™** supplies important enzymes that offer additional benefits, including support for the immune system, hormone processing, circulatory system, and digestive system.

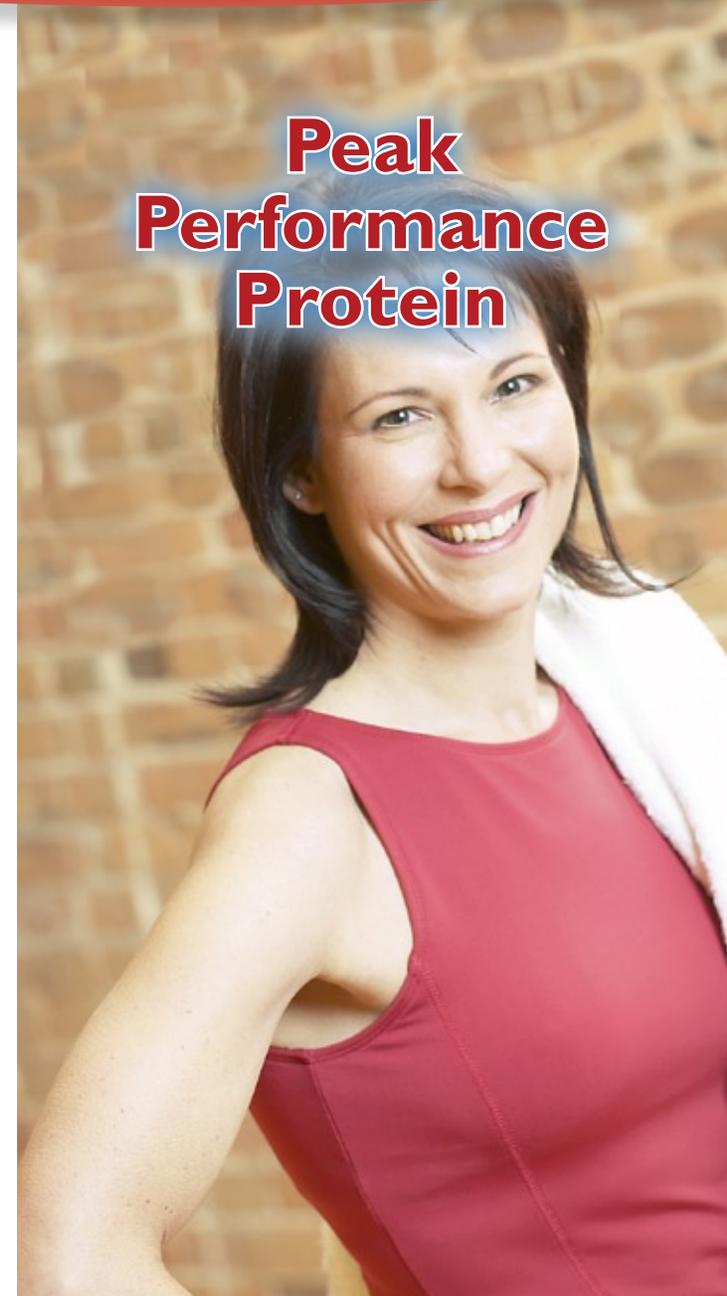

B12-2000™ is a flavorful lozenge supplying sublingually absorbed B12, with folic acid and B6, nutrients negatively impacted by oral contraceptive use. **B12-2000™** provides nutrients that not only protect against neural tube defects, but also suppress homocystine levels in men and women.

Quality Whey Protein Isolate
from Biotics Research Corporation

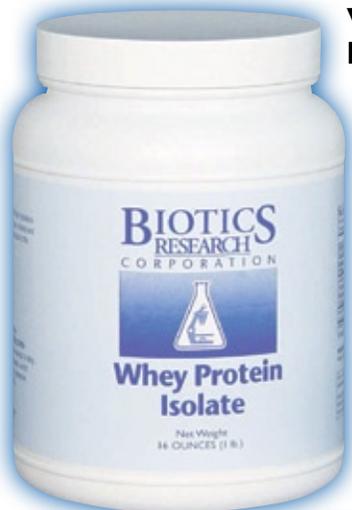

Which Whey ?

Whey Protein Isolate from Biotics Research Corporation provides all the important benefits of the industry's highest quality nutritive protein supplement as an easy to mix, pleasant tasting, all natural powder.

Undenatured Proteins

Although whey protein has the highest biological value rating of all proteins, all whey protein products are not created equal. Most whey proteins are processed using technologies which result in the denaturing of the proteins, thereby reducing important, biologically active proteins, such as lactoferrin (LF), immunoglobulin (IgG), and glycomacropeptides (GMP).

The unfortunate truth is the quality of dietary supplements varies tremendously from manufacturer to manufacturer, and many products are not what they represent to be. To ensure you receive the products you need, ask your doctor. Your doctor can recommend the products they have confidence in based on consistent and effective clinical results.

Whey Protein Isolate from Biotics Research is produced using a natural, ultra-low temperature microfiltration method. The result is a product supplying a full balance of bioactive whey proteins with an excellent amino acid profile.

Who Should Take Whey Protein Isolate from Biotics Research Corporation?

Athletes wishing to improve their performance, those having a digestive imbalance or struggling with insulin resistance, those dealing with the symptoms of chronic fatigue, or anyone needing to increase their intake of high quality protein could benefit from whey protein supplementation. In addition, the immune enhancing properties of **Whey Protein Isolate** are potentially beneficial for everyone.

The potential benefits of Biotics Research's **Whey Protein Isolate** are numerous. For example, ingestion of whey protein by chronically ill patients has been studied, and results indicated lower oxidative stress, resulting from increased plasma glutathione (GSH) levels in study participants.

Whey Protein Isolate from Biotics Research is Kosher and Halal certified.

Nutrition Facts

Serving Size: 2 level scoops (22 grams)
Servings Per Container: 20

Amount Per Serving:			
Calories		80	
		% Daily Value*	
Sodium	30 mg	1%	
Potassium	80 mg	2%	
Total Carbohydrate	1 g	<1%

INGREDIENTS: Whey protein isolate (ultra low temperature micro-filtered).

DIRECTIONS: Add two (2) scoops to 16 oz. of cool water (or the beverage of your choice) and stir or blend, as a dietary supplement or as otherwise directed by your healthcare professional.

Each serving provides the following (stated amounts are typical and representative):

Beta-Lactoglobulin	11,410 mg
Glycomacropeptide	2,200 mg
Bovine Serum Albumin	506 mg
Alpha-Lactalbumin	3,014 mg
Immunoglobulin (IgG)	550 mg
Lactoferrin	30 mg

Typical Amino Acid Profile Per Serving:

Alanine	1,096 mg	Lysine	2,430 mg
Arginine	490 mg	Methionine	470 mg
Aspartic acid	2,230 mg	Phenylalanine	650 mg
Cystine	530 mg	Proline	1,160 mg
Glutamic acid	3,680 mg	Serine	920 mg
Glycine	352 mg	Threonine	1,330 mg
Histidine	352 mg	Tryptophan	328 mg
Isoleucine†	1,290 mg	Tyrosine	630 mg
Leucine†	2,270 mg	Valine†	1,050 mg

† Branch chain amino acids

Contains ingredients derived from milk.

CAUTION: Not recommended for those allergic to dairy.
